QUALITY LIVING USING HYPNOTHERAPY

SYNOPSIS

Human beings always act & feel & perform in accordance with what they imagine to be true about themselves & their environment. This is their self-image. You cannot escape or outperform that picture. You can dissect it, analyze it, uncover what is in it that is not true about yourself & alter it. You can even modify it without examination of the past. But you cannot escape it. You will always act, perform & experience appropriate results, in accordance with what you imagine to be true about yourself & your environment. This is the fundamental law of the mind.

Thoughts + Emotions + Actions = Results.

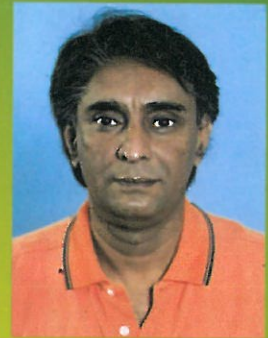

You act & feel not according to what things really are like, but according to the image your mind holds of what they are like. You have certain mental images of yourself, your world & the people around you & you behave as though these images were the truth, the reality, rather than the things they actually represent. This is done on an unconscious level. You can transform your life by changing your self-image by providing it with new truth. Hypnotherapy is a very powerful tool that can access the creative resources within you to bring about the changes...that you desire.

CANSURVIVE & IT'S PURPOSE

Cansurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word "Terminal" is a challenge, not a death sentence.
